

16 output remote module for MULTISCAN++S1/SENTOX IDI+, Open collector, up to 256 outputs

STG/OUT16-S

The STG/OUT16-S allows additional open collector outputs to be connected to the ST.MTS/S1B gas control panel. Each module provides 16 open collector outputs. The addressable output module connects to the RS485 serial bus of the ST.MTS/S1B gas control panel. Up to 16 modules may be connected to RS485 bus.

In situations where relay outputs are required, rather than open collector outputs, the STG/8REL may be used. The STG/8REL connects to the STG/OUT16-S, and up to two STG/8REL modules can be connected to each STG/OUT16-S.

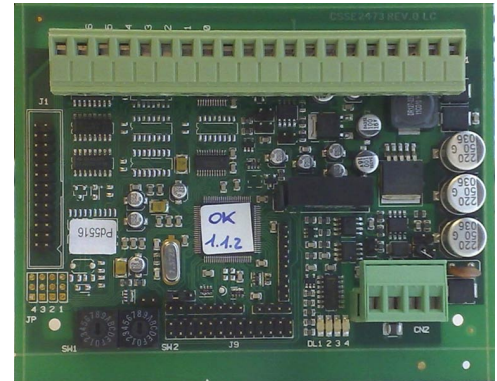

The STG/OUT16-S may be optionally housed in the FGA120B IP55 plastic box.

Specifications

Number of outputs	16 open collector
Open collector rating	20 mA
Dimensions	120mm w x 90mm h

Ordering Information

STG/OUT16-S	16 output remote module for MULTISCAN++S1/SENTOX IDI+, Open collector, up to 256
STG/8REL	8 relay board to be connected to STG/OUT16-S
FGA120B	Housing for STG/IN8-x or STG/OUT16-x modules, IP55

- 16 open collector outputs
- Up to 16 addressable modules connect to RS485 bus
